How Do Commercial Properties Use Energy?

EMS Benefits For Commercial Building Portfolios:

- With eSight, property managers can manage all energy related data for multiple sites and buildings in a single system
- The software also allows you to display multiple sites and buildings on an interactive map and navigate quickly to the chosen location
- Generate bills for tenants based on actual consumption
- Model and forecast energy usage to set, track and achieve targets
- Compare individual sites/tenants/departments in a league table to identify the best and worst energy performers
- Encourage behavioral change with engaging, interactive public dashboards
- eSight is already used by a wide range of property clients, from large real-estate organizations to retail sites, hotels and stadiums.
